  – And what to consider?
There are more than 200 dissertation on nursing in the Netherlands and Flanders. This platform aims to make this scientific knowledge more accessible for students, teachers, nurses and advanced nurses. They may find out more about evidence based nursing interventions for patients with physical, mental, functional and, or social problems. They also can find knowledge about nursing policy, education, target groups and different fields. Researchers and PhD-students are invited to upload their dissertations. The more scientific information on this site, the better evidence based nursing practice will be.

This website is an initiative of Bureau Lambregts with more than 25 years knowledge and practical aid contributes to the nursing development. The site is financially supported by Stichting Publicaties voor Verpleegkundigen en Verzorgenden.
Horizon 2020 Funding

- **Eddie Townsend**, EU funding specialist

The Commission is an investor and each proposal is a business case seeking investment. The Commission asks 3 questions like any other investor.

1. Is this an innovative idea in an area that we the Commission have decided to invest in and published in our Work Programme?

2. Does the proposing organisation / consortium have the skills, knowledge and competences to deliver the project?

3. What will be the impact on a European scale (ROI)?

Find the best people to work with, look at as a business plan and see through the myths that are peddled around.
Next steps 3/3: Activating the EuroFM potential

1. Visit of the CANG (Mauro)

2. Integrating Workshop tomorrow:
   – Mark Mobach: Innovation in FM
   – Susanne: The EuroFM contact database
