CAFMWORLD

Digitalization of the real estate industry

Presented by

CAFMRING
VERBAND FÜR DIE DIGITALISIERUNG
IM IMMOBILIENBETRIEB
gefma

Topics of the CAFMWORLD Congress

CAFMWORLD, under the patronage of **CAFM RING e.V.** and **gefma**, is the central meeting place for digitalisation in facility management and the real estate industry.

As a satellite event of **BIM World MUNICH**, it made its debut in 2024, providing companies with a platform to showcase their CAFM software and other digital solutions for the facility management and real estate industry in a dedicated exhibition area. Over two days, the CAFMWORLD **Breakout and Congress stages** feature a diverse program, offering visitors inspiring insights and innovative impulses.

At a time when digitalisation and increased efficiency play a crucial role in facility management, CAFMWORLD creates **a unique platform**. It brings together leading industry experts, visionary technology providers and decision makers to shape the future of digital facility management.

The **CAFMWORLD Congress** offers an agenda full of inspiring **keynotes**, in-depth technical presentations and high-calibre **expert panels**. The focus is on sharing knowledge and best practice — with the clear aim of actively shaping the future of CAFM. At the CAFMWORLD **Breakout Session**, users can find out about innovative products and solutions from the industry.

This year, special attention will be given to **Building Operating Systems (BOS)**. These central software platforms enable the efficient digital control and automation of buildings throughout their entire life cycle. Especially in facility management, BOS unlocks new opportunities to optimize operations, reduce costs, and enhance sustainability.

But also the integration of **IoT solutions** into facility management and the growing role of **artificial intelligence** will once again be key focus areas.

CAFMWORLD stands for:

- + Driving the digitalisation of facilities management through knowledge sharing, innovation and collaboration
- + Bringing together different areas / segments of facility management
- + Exchanges between stakeholders working towards a sustainable and innovative future for the facilities management and property industries

The **CAFMORLD** exhibition extends over a spacious area on the 1st floor of the ICM – International Congress Center Messe München. This area also hosts the CAFMORLD Breakout Session as an open stage, along with the networking zone.

The **specially curated congress programme** will be presented on one of the congress stages, which are also located on this level.

Both **exhibitors** and **speakers** receive comprehensive **visibility** through targeted communication measures — from newsletters to the website and social media.

Highlights of the CAFMORLD Congress programme:

Management
Management of facilities, energy, risk, land, personnel, ...

Digitalisation
KI, Big Data, Cloud, IoT, PropTech, Open BIM, CAFM, RPA, DMS, ERP/SAP, ...
